Application for IT Consultant (m/f/d) – Energy Industry

Dear Hiring Team,

I am excited to apply for the position of IT Consultant in the Energy Industry at ITS Group. With more than four years of experience as a Senior Software Developer and Team Lead, I bring a strong technical foundation combined with consulting, process modeling, and project coordination skills that align well with your requirements.

In my roles at Proxym Group, Edorer Inc., and Konnect Networks, I was responsible not only for developing complex software solutions but also for advising stakeholders, analyzing requirements, and documenting processes. My experience in agile environments, particularly with SCRUM, has allowed me to deliver results effectively while ensuring transparent communication with clients and colleagues. I have also supported internal process optimization and contributed ideas to product development, strengthening cross-functional collaboration.

I am especially motivated by the chance to support customers in the energy sector, where digitalization and efficient business processes play a critical role. My international background and language skills (Arabic native, English C1, French B2, German B1 – continuously improving) enable me to work effectively with diverse teams and customers. I value building trust, providing clear solutions, and maintaining strong communication throughout projects.

I am confident that my technical expertise, consulting experience, and ability to connect with people will allow me to contribute meaningfully to your projects. I would be very pleased to discuss my qualifications further in a personal interview.

Thank you for your time and consideration.

Sincerely,

Fakhreddine Messaoudi
